### **DETAILED ACTION**

This is the first action relating to serial application number 10.674,091 filed 09/30/2003.

Claims 1-11 are allowed.

#### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### ***Drawings***

2. The examiner has accepted the drawing filed with this application as formal drawing.

#### ***Reasons for allowance***

3. The following is an examiner's statement of reasons for allowance: the prior art fails to anticipate or render obvious the combination of a system for controlling an automatic transmission as set forth in claims 1 and 6, and a method for controlling the automatic transmission in claim 7, and most significantly, the system requires providing first and second indicated values of the line pressure to control the circuit when the transmission oil temperature at engine start is equal to or smaller than a predetermined temperature and the second indicated value being provided when the drive range is selected, the second d indicated value being provided when it is determined that the actual value of the second line pressure is equal to or greater than the predetermined value; and when it is determined that the actual value as determined is held for the period longer than the low-pressure control set time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. JP (2003/-7038), JP (10-148252), JP (04-73457), JP (11-108171) and JP (06-229462), Sakakibara et al. (5,218,541), Ui (6,530,860), Lee (6,494,808), Hino (US 2002/0022547) and Nishigaya et al. US 2001/0044350) disclose an automatic transmission comprising an oil temperature sensor for determining the pressure in the line system.
